A Pro-H Series Automatic Lighting Control System by BlueSpring Controls reduces your energy costs using a sophisticated micro-controller that is easy to program and use. There are no cumbersome, hard to read buttons. Everything is accessed through the free BlueSpring App available on Google Play® and the Apple App® store from your smart phone. Location setup, Daily and Holiday Schedules, Zone schedules, all from our easy to use app.
And like all the fine products from BlueSpring Controls, there is no need to access the local network. Our Lighting Control Systems work directly via it's built-in WiFi network with your smart phone. There are no internet security issues with BlueSpring products. And every Pro-H series controller is built to exact customer specified requirements, so you never pay for extras you don't need.
It just works....All the time!
